This music has been learnt by listening and singing for many generations, and this is how the old musical nuances and idiom have been kept. Transcribed folk music can not replace the old way of learning. If one wants to include all details in a transcription the music will be hard to read. It is therefore - and in order to hear the Norwegian pronunciation - highly recommended to listen to the recording of this arrangement on CD: "**BERGTATT**", FXCD 214, sung by Oslo Chamber Choir.
